Chartered Environmental Surveyors Environmental Consultancy Development Services

If you or your clients are property developers, industrial operators, waste management operators or a small to medium sized business, Ivy House Environmental aim to provide economic environmental solutions to ensure your regulatory obligations are met on time and within budget. We have developed our range of services from our experiences within the global environmental consultancy market and have expanded our technical advisory services to include geotechnical design for foundations, slopes, retaining walls, ground improvement and earthworks supervision.

For the professional development of your staff we can also offer bespoke training packages, seminars & mentoring.

SERVICES

Site Investigation

SI services for development sites, existing industrial sites, geotechnical works, hydrogeological assessment, waste management or minerals extraction. Our experienced engineers supervise site works & drilling contractors to ensure compliance with our client's brief & prompt completion of works.

Geotechnical Assessment

Our specialist engineers are experienced in foundation design for residential, commercial & industrial development, slope stability assessment, retaining wall design, ground improvement works & earthworks supervision.

Contaminated Land Assessment & Remediation

Phase I and Phase II assessment of potentially contaminated land for development, waste management operations & hydrogeological assessment. Formulation of Detailed Quantitative Risk Assessment for human health & controlled waters to assess remedial requirements. Development of remedial strategy, contractor consultation, appointment & project management. Projects undertaken on all risk basis or according to client's contractual requirements.

Environmental Audit

Experienced auditors can provide services for IPPC, waste minimisation, sustainability assessment, ISO & due diligence audits. Audits can be integrated into overall site assessment & development packages to provide sales information packs & compliance documentation.

Waste Minimisation

Advisory service for commercial, industrial & agricultural operations. Waste stream audits & checks, development of a waste minimisation strategy, compliance auditing & reporting. Staff training & funding/grant application advisory service.

Waste Management

Application for waste management licence & surrender. Waste classification assessment & disposal advice. Haulage & disposal of waste materials, recycling & re-use. Landfill leachate, groundwater & landfill gas assessment & monitoring.

Sustainable Development

Carbon neutral development advisory service, energy rating assessment, sustainable impact assessment & environmental impact assessment.

IPPC

Permit applications & audits; compliance audits & implementation of environmental management systems. Site condition reports & regulatory liaison.

Training & Professional Development

Ivy House Environmental have experience in developing & presenting environment specific training packages on topics including environmental awareness, waste management & minimisation, the contaminated land regime & sustainable development. Packages are available for presentation to your clients/staff & can be tailored to match your requirements.
